

# Vimpelcom Beeline, G-TEL Corporation

EA|GA project 07B001

EA|GA East Asia Global Alliance

55/11 Le Thi Hong Gam St.  
Nguyen Thai Binh Ward, D1, HCMC, Vietnam

Beeline is one of the most powerful brands in the world with over 16 years of history dating back to 1993. Beeline's presence in Vietnam is the culmination of the trilateral agreement established by the principals of EA|GA, Mr. Douglas E. Railton, Mr. Kerry Smith and Mr. Robert R. O'Neill, between the Gtel Corporation, VimpelCom and the Millennium Group.

Beeline™

Gtel is an organization that has cooperated with different branded telecommunications companies all over the world, such as Alcatel Lucent, Ericsson, Huawei, Comverse, Avaya, Comverse and IBM to deploy its GSM network.

VimpelCom was the first Russian public company to be listed on the New York Stock exchange outside of the Russian Federation.

Vimpelcom uses Beeline with G-TEL Mobile VN as the brand-name in the Vietnamese telecommunications market and is the leading integrated telecommunications operator in Eastern Europe & Central Asia. One of the critical requirements for the success of Gtel Mobile to do business for profit in Vietnam, and to be granted an extremely sought after GSM License and Frequency in Vietnam, was the ability and success of the principals of EA|GA to bring VimpelCom's first investment outside of the CIS Region to Vietnam.

With an investment exceeding US\$1 billion for development of the network rollout, management expertise and marketing capability, to ensure the success of the G-Tel Mobile project. From concept to fruition, this trilateral agreement, established in July 2008, culminated in the telecommunications enterprise now recognized throughout Vietnam as Beeline. Beeline VN now has over 500 highly qualified staff and 10 international experts working at their head office in Hanoi as well as branches in Da Nang and Ho Chi Minh City.

G-TEL Mobile is not only a business enterprise but also the international combination aiming to bring Vietnamese people a new trend and style in the telecommunications industry. GTEL now provides GSM/EDGE voice & data services to the people of Vietnam.

Due to the success of the Beeline project EA|GA principals are now focused on developing their second Telco, the Trilink Corporation, an emerging provider of telecommunications in the Philippines. Business activities will include wholesale termination services through an international gateway, voice and data services, national ITC program responsible for ARMM region implementation, Planet Online ASEA/Satellite (O3b) network and the BIMP-EAGA Cable Consortium.

Interested parties wishing to discuss investment opportunities in this exciting Telco should contact our Chairman and CEO Mr. Douglas Railton.
